

CA 65-62
15 March 1965

United States Government
Washington, D. C.

Attention: Contracting Officer

Subject:

Gentlemen:

As a result of discussions with Technical Representatives of the Government with respect to the desirability of obtaining data on accuracy versus relative humidity on the Phase II Linear Phasolver, we submitted a Statement of Work with our price for its accomplishment under date of 11 March 1964.

You will note, from the contract completion schedule submitted with the February Status Report that Phase II System Test is scheduled to begin approximately 17 March 1965.

If it is your intention to include performance of this additional humidity test we would appreciate, in fact, we require an immediate authorization to proceed with this additional work and an indication as to the acceptability of our price.

Very truly yours,

Contract Administrator
